

Seminarium med Professor Dick Bierman

6:e oktober 2018

**“Parapsychology needs a theoretical program”:
Rather than accumulating evidence on oddities we need to
formulate theories that at least suggest further research
but preferably have testable predictions.**

- 9.30 – 10.00 Registrering/kassan öppen
- 10.00 – 11.30 Om Presentiment-studier: kan kroppen reagera på stimuli innan de visats? – om ny forskning, bl a med EEG
- 11.30 – 13.00 Lunch
- 13.00 – 14.30 **Andra nya projekt:**
Issues that primarily are issues of theory:
Creating temporary artificial brain lesions and the effect thereof on PK,
The hypothesis of time-symmetry,
The hypothesis of the relation between brain coherence and effect size.
About a generalized quantum theory – are there anomalous correlations hidden in the correlation matrix ?
What is needed to get exceptional data accepted by mainstream science?
- 14.30 – 16.00 Frågor & svar
